Beach House Shake - Hatteras

The perfect low maintenance exterior products

The Tando brand of exterior building products leverages innovation and manufacturing technology to solve market challenges such as labor shortages, long lead times, and moisture concerns, all while meeting the consumer demand for mixed material exteriors and low maintenance. From launching the first polymer shake over 40 years ago, to developing the #1 Brand of composite stone, Tando has a proven history of creating new categories, including TandoStone®, Beach House Shake®, and TandoShake®.

First there was stone. Then stone veneer. Now there's TandoStone.

Installing the look of stone is a smart investment that adds instant value to any home. However, labor shortages, job site delays, and moisture management issues mean daily challenges to complete stone projects on time and within budget.

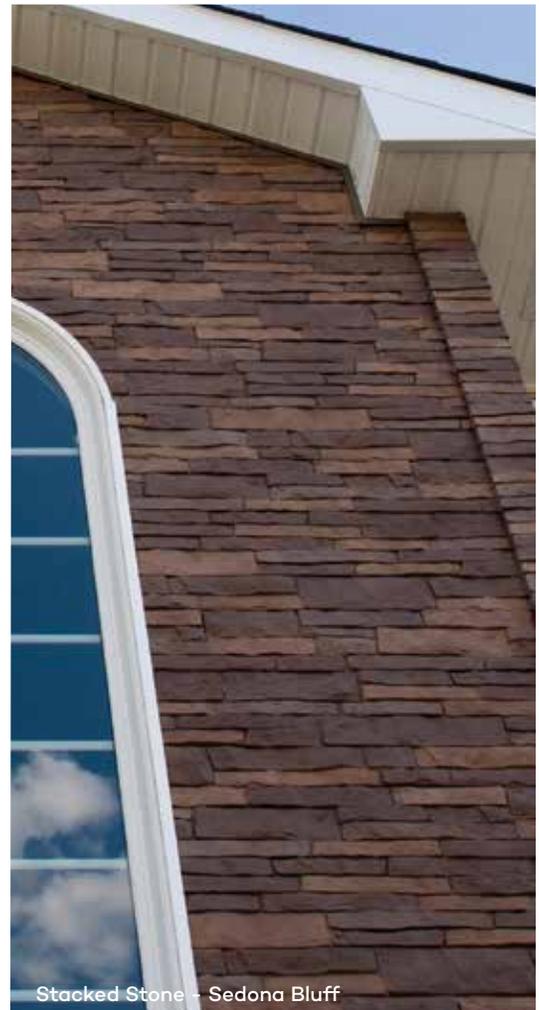

Traditionally, stone installation is contracted out to a mason - increasing completion time and adding to the overall expense. And stone or stone veneer is heavy and difficult to cut. But what if siding applicators had a product they could use to complete a project that looks and feels just like stone?

Enter TandoStone, the #1 Brand of Composite Stone. TandoStone features lightweight yet rigid panels that are easy to install using traditional siding tools, but without mortar or adhesives. TandoStone's lightweight design also means it can be installed easily by one-person. And, the same installer can install siding and TandoStone - thereby increasing an installer's "share of wall", while saving time and money.

Lastly, TandoStone's proprietary composition is impervious to moisture - making it perfect for installation in any weather, as well as, to ground level or up to the roof line. With TandoStone, the sky is really the limit.

Creek LedgeStone - Bucks County Gray

Stacked Stone - Sedona Bluff

TandoStone is available in two styles:

Stacked Stone features a dry stack profile with large stones and smaller stones tightly arranged in a linear pattern.

Creek Ledgestone emulates the look of various sized, hand-picked stones arranged in a rugged pattern.

All TandoStone products feature Tando TruGrit™ technology, a unique finish that gives each panel the rough, gritty feel of natural stone.

Labor Shortage Drives Need for Change

A survey of builders conducted by the NAHB/Wells Fargo Housing Market Index found that bricklayers and masons were among the top five specialized trades where serious shortages or some shortage of labor is reported. The surveyed builders reported shortages 73% of the time while trying to source bricklayers and masons.

TandoStone is perfect for any application

The trends in single family housing, multi-family housing and commercial construction - for new construction as well as the Replace & Remodel market - have created a favorable dynamic for TandoStone.

TandoStone meets market demands for low maintenance without compromising on natural beauty and texture. Additionally, it gives designers, specifiers, and installers the opportunity to turn walls into mixed material exteriors while addressing and mitigating the issue of moisture management.

TandoStone is a great choice for single-family, multi-family, and commercial projects. With its ease of installation, cost benefits, and proven performance, TandoStone is really a great solution for new construction or the R&R market.

Stacked Stone

Our Stacked Stone features stones with low heights and random lengths for the appearance of a hand-laid, mortar-less dry-stack set which gives it a contemporary, sharp edged finish.

Stacked Stone has the rich, natural feel of Tando TruGrit.

The Transition is Easy with Tando Architectural Sill

Tando Architectural Sill is a deep profile that is architecturally accurate with a realistic look and feel.

Designed with a slope forward to direct water away from a structure, Tando's Architectural Sill offers superior moisture management while delivering beauty and functionality.

As a complement to the Architectural Sill, Tando has also developed an Architectural Sill Corner that can be used as a corner or can be easily cut on the left side or right side to act as an end cap to terminate a run.

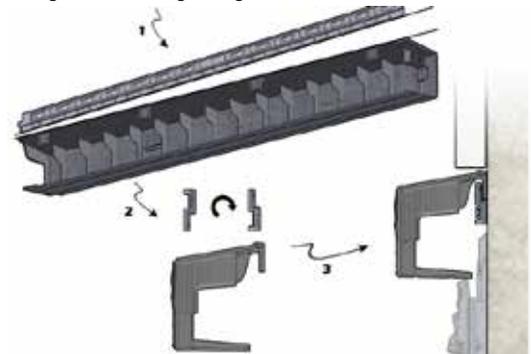

The Architectural Sill offers two other game-changing innovations: an integrated nailing flange that can be re-purposed as a starter strip to easily install the Sill under a window and breakaway spacers on the back of the profile that can be used as "shims" to transition products that require additional clearance.

Tando's Architectural Sill works with all TandoStone products.

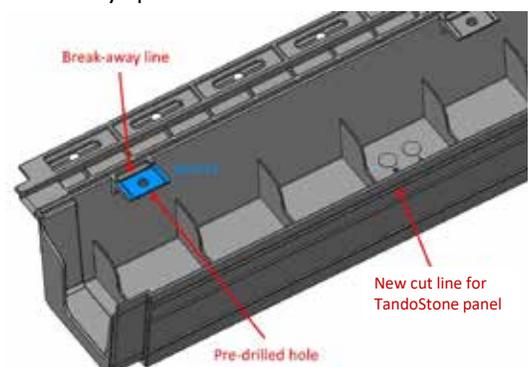

Architectural Sill Corners can be used as a corner or to terminate the end of a run.

Beach House Shake®

Beautiful Freedom

Classic Beauty Without Compromise

Fresh cedar has a warm rich hue until exposure to the elements causes unattractive discoloration, streaking, and splitting. Preserving the natural look is a never-ending battle.

Just imagine if your cedar could stay looking like the day it was installed, for the life of your home. Now it can with Beach House Shake.

Beach House Shake is the only product on the market that will stay looking like the day it was installed – a promise that’s backed by an unmatched 20-year “Beautiful Freedom” warranty.

- Unique KAPGUARD® with Kynar® coating provides guaranteed color protection for 20+ years
- Precision cut “perfection shake” with straight and true squared edges
- Unique edge grain texture offers an unmatched level of detail
- Traditional saw cuts create subtle variations in wood grain for a randomized appearance

Beach House Shake is everything you want from natural cedar. Nothing you don’t.

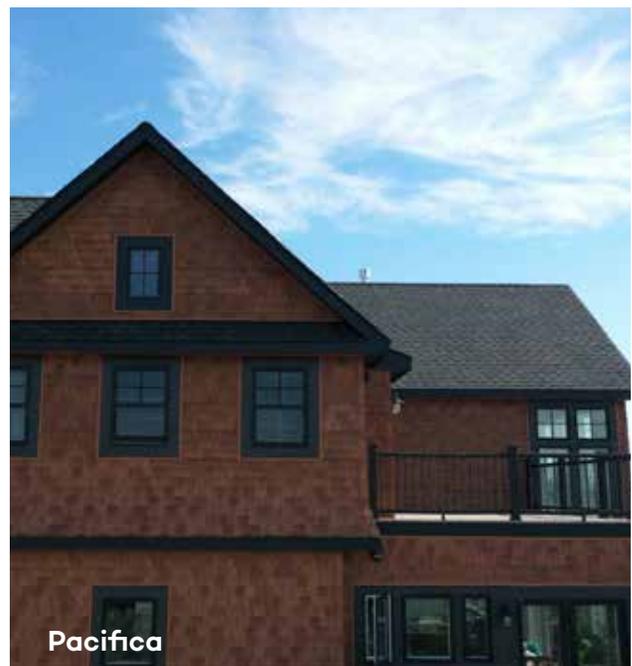

Beach House Shake®

Beautiful Freedom

Beauty That Never Grows Old

Crafted for homeowners who value the authentic beauty of wood, Beach House Shake is the ultimate in low maintenance and high performance.

- Four perfectly designed options indistinguishable from fresh or perfectly weathered cedar shingles
- Stays looking like the day it was installed with little to no upkeep
- Will not discolor like traditional cedar shingles regardless of exposure to sunlight and moisture
- Will not split, crack, rot or decay
- Impervious to moisture – stands up to salt spray, storms, humidity, snow and sun
- Won't be damaged by pests and insects
- Engineered and approved by Miami-Dade County for high wind and high impact resistance; successfully meeting all severe weather rigorous testing criteria

CHECK OUT THE BEACH HOUSE SHAKE TIME MACHINE!

Natural cedar shingles look great the day they're installed, but they'll never stay that way. With Beach House Shake, even years later, you'll have a look that looks just like the day it was installed with no upkeep. The Beach House Time Machine lets you see how Beach House Shake compares to cedar shingles! Scan here to see it for yourself!

Beach House Shake®

Beautiful Freedom

Why Beach House Shake?

"Beach House Shake in Atlantica color was an easy choice for the homeowner and a great choice for us, with quick, easy, one-person installation. Beach House Shake installs in a fraction of the time of traditional cedar shingles. Beach House Shake will stay looking like the day it was installed without any discoloration. With Atlantica, a soft, silvery gray, the homeowner will have the freedom of a perfectly weathered exterior with little to no upkeep."

COLOR: Atlantica
LOCATION: Rehoboth Beach, DE
CONTRACTOR QUOTE: Kelsey with Boardwalk Builders

"Michele and I fell in love with it! Beach House Shake in Pacifica was the answer to our prayers. We created a color décor palette around our house to match it. We're amazed at how many people are fooled by Beach House Shake. They think it's cedar. A friend who operates a cedar mill created a 12 ft. pergola for us and even he thought it was authentic cedar, and he works with cedar every day!"

COLOR: Pacifica
LOCATION: Bessemer, AL
HOMEOWNER QUOTE: Philip

"Our house is right on the water's edge on Little Alum Lake, and we have a boat, so enjoy the outdoors. We loved Beach House Shake's "Hatteras" gray color because it fits right into the New England coastal look – and mostly, the realism – you can't tell that it's not actual cedar shake. I was really sold on the color fade warranty and lack of maintenance. Our house is designed to be low-maintenance, so Beach House Shake was the perfect solution."

COLOR: Hatteras
LOCATION: Brimfield, MA
HOMEOWNER QUOTE: Anthony

"We think it's an incredible product. We really wanted to stay true to the times and have our home look as realistic as possible. Natural cedar looks great to start, but fades in such a short period of time and I just didn't like the effect that time had on it. Beach House Shake will maintain its coloring so I can relax and not worry. When people come to see our home, they can't even discern that this is a manufactured product. On top of that, the costs of renovation are so extreme, the long-term savings alone is reason enough for everyone to consider this as an option if the look of natural cedar is what they desire."

The Original and Most Iconic Shake

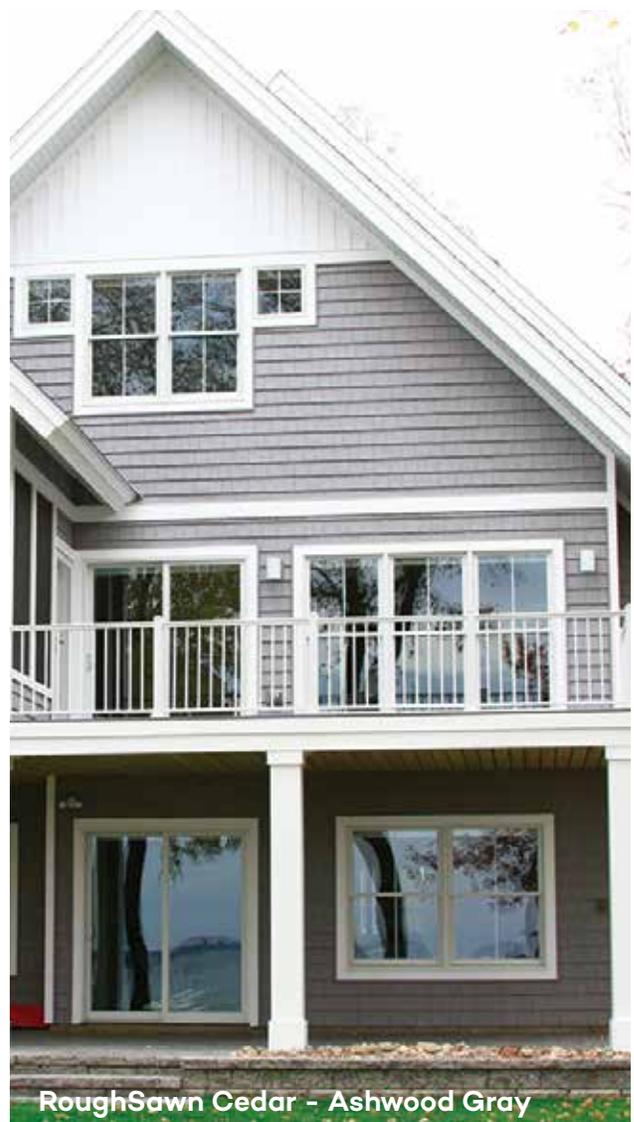

TandoShake is the perfect low-maintenance alternative that enhances any home style and adds instant curb appeal. With 4 styles, TandoShake showcases a broad range of wood grain textures, from fine & subtle details to rugged grooves, combined with an extensive color collection to fit any home architecture or style.

Cape Cod Perfection and RoughSawn Cedar have fine wood grain textures and evenly aligned shingle heights, balanced by varying shingle widths, offering clean lines and an upscale look and feel.

Rustic Cedar 9 and Hand Split Shake feature more rugged looks. With varying shingle heights and widths combined with deep wood grain textures, these profiles simulate the true hand crafted appearance of wood shakes.

Hand Split - Barn Red

RoughSawn Cedar - Ashwood Gray

TandoShake Options:

Cape Cod Perfection

Our Cape Cod Perfection is a 5" exposure, re-squared and rebuffed shingle with clean lines and a cedar texture. The six solid colors highlight the subtle nuances of saw cuts and grain to perfectly replicate painted cedar shakes.

Cape Cod Perfection can be installed with a roofing nailer and has a notice of acceptance from Florida's Miami-Dade County for wind and impact resistance in High Velocity Hurricane Zones.
